

2012- HAZARDOUS MATERIALS CERTIFICATION PROGRAM

49 CFR | IATA | IMDG

Your company can not afford to be out of compliance with 49 CFR rules regarding the transportation of Hazardous/Dangerous materials. The regulations concerning certification mandate that each and every employee involved with the transportation of Hazardous/Dangerous materials must be certified. There is no "house" coverage simply by having one certified person on staff. Anyone who makes or takes bookings for Hazardous shipments, passes documentation for, drives a vehicle carrying, or in any way becomes involved in the transportation of Hazardous/Dangerous goods is required by law to be both job-specific and generally certified in 49 CFR, IMDG, and/or IATA rules as per the application. These courses provide full certification.

For the 15th consecutive year, The Transportation Council is pleased to present Domestic HazMat, International Air HazMat (IATA) Training & Certification and International Ocean HazMat Training & Certification (IMDG). We welcome internationally recognized expert Tom Ferguson, of Currie Associates, Inc. as our presenter. The training will be held at the Rochester Business Alliance.
